### **DETAILED ACTION**

This action is in response to applicant's amendment received on 8/09/01.

#### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

2. Claims 7, 9-12 are rejected under 35 U.S.C. 102(a) as being anticipated by Shimizu et al.

Shimizu discloses the process including a strip 100 having a plurality of substrate areas, providing a plurality of alignment marks 18a (Fig.3A), providing a plurality of cutting marks 2 (Fig.3A), positioning the saw machine with respect to the substrate area, cutting each individual substrate areas (Fig. 1A).

#### ***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claim 12 is rejected under 35 U.S.C. 103(a) as being unpatentable over Shimizu et al. in view of Drussel et al.

Shimizu discloses the method substantially as claimed except for two substrate strips juxtaposed for cutting. However, Drussel teaches the use of the method of two substrate strips juxtaposed for cutting for the purpose of increasing the production. It would have been obvious to one of ordinary skill in the art at the time the invention was made to have modified Shimizu's device by providing the method of two substrate strips juxtaposed for cutting as taught by Drussel in order to increase the production.

### ***Response to Arguments***

3. Applicant's arguments with respect to claims 7, 9-11 and 12 have been considered but are moot in view of the new ground(s) of rejection.

### ***Conclusion***

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Okada is cited to show related device.
